

Acid Neutralizer 118ml (HSC18004)

Highside's Acid Neutralizer is designed to chemically neutralize and prevent acids that are formed in air conditioning and refrigeration systems due to refrigerant and refrigeration oil break down, moisture and compressor burnout. Acid Neutralizer is recommended to prevent the formation of acid and for systems that are showing signs of acid build up or where a compressor burnout has occurred.

Acid neutralizer can be used for:

PREVENTIVE MAINTENANCE: When the use of an acid test kit indicated no acid or low acid levels, Acid Neutralizer can be used to prevent the formation of acid or neutralize existing acid by adding one ounce of Acid Neutralizer for each 64 ounces of compressor oil.

MAINTENANCE & REPAIR: When acid related problems are evident or if a test of the system shows acid is present at medium levels, Acid Neutralizer can be used to neutralize existing acid by adding one ounce of Acid Neutralizer for each 48 ounces of compressor oil.

BURNOUT CONDITION: Should high levels of acid be detected or if burnout has occurred, Acid Neutralizer can be used to neutralize existing acid by adding one ounce of Acid Neutralizer for each

24 ounces of compressor oil. NOTICE: If burnout has occurred, follow standard industry practices and change out the compressor. Install all recommended filter/driers then evacuate and charge the system with the proper refrigerant.

Benefits

- No Solids or Solid residuals
- Easy to Use, No Complicated Charts
- Compatible With All Refrigerants
- Compatible With All Lubricants
- Works Fast
- Circulates Quickly
- Will Not Harm System Components
- Can Prevent System Burnout
